

Orchidview Phrags Offerings

Last update: November 16, 2009

The following kovachii hybrids are available in 3 sizes
Community Pots have 5 seedlings. They are \$125 each.
3 ¼" pot seedlings are \$75 each
2 ¼" pot seedlings are \$50 each

Phrag. (Bel Royal x kovachii)

Phrag. Bel Royal (Memoria Dick Clements x Sorcerer's Apprentice)
is a chartreuse flower overlaid with cranberry red which should give
a brilliant color when combined with the purple of Phrag. kovachii
which has not proven to be dominate. We believe the flowers will
be as large, maybe larger, than the Allison Strohm (kovachii x Living Fire).

Phrag. Fritz Schomburg
(kovachii x besseae)

Natural Spread 12 cm, petal width 4.4 cm which is pretty impressive.

The best description of color is salmon, coral or my favorite, carmine.
Our two awarded clones vary a bit in color but are each in this color range
Pictured photo above is Phrag. Fritz Schomburg 'Katherine' HCC/AOS

Orchidview Phrags Offerings

Phrag. Fritz Schomburg

(kovachii x besseae var. flavum)

Color is the only difference in this and the above cross. Phrag. besseae var. flavum changed the coloration to a very soft pink.

Pictured photo above is Phrag. Fritz Schomburg 'Fritz Peaches n Cream'

Phrag. Peruflorea's Cirila Alca

(kovachii x delessandroi)

Another primary hybrid that should be much like Phrag.

Fritz Schomburg but with slightly down-turned petals and possibility of higher flower count and branching. .

Phrag. Peruflorea's Spirit (Limited number near flowering size)

(kovachii x Eric Young)

Blooming size - a very few are available. See Sample photo pictured above

Phrag. Eumelia Aires (kovachii x schlimii)

The standard phrags hybrids are available in seedling size

2 ¼" pot seedlings are \$35 each

Orchidview Phrags Offerings

Phrag. Prissy 4N (St. Ouen x besseae)
One of our truly red phrags.

Phrag. Cahaba Glow
(Sunset Glow 4N 'Twilight' AM/AOS x
besseae 4N 'Kathy' AM/AOS)

Phrag. besseae has added gorgeous deep color to Sunset Glow.
